#### 16. Risk Management Function

Risk-taking is an inherent element of the banking business whereby profits are in part, the reward for successful and acceptable risk-taking. While, on the other hand, undue and poorly managed risk are susceptible to loss of profit and thus jeopardize the safety of the depositors. To ensure effective risk management, the bank has appropriate risk governance structure and risk management process, policies considering the size and nature of business.

#### Credit Risk

Credit risk management strategies include effectively managing the risk of financial losses arising out of booking an exposure on counterparty and also ensuring independence of the credit risk function from the origination, trading and sales function. Credit risk is managed through a defined framework which sets out policies, procedures and standards covering the measurement and management of credit risk. Clear segregation of duties has been established between transaction originator in the business and the approvers in the risk function.

#### **Operational Risk**

Operational risk can be caused by both internal and external sources, such as fraud, business interruptions, system failures, damage to physical infrastructure, failure in execution and service delivery, inherent risks in products. The risk can occur in any business function or the business supporting functions. The effect of failure in any of the resources can have concurrent impacts across the Bank. Effective operational risk management system aims to minimizing losses and customer dissatisfaction due to failure in process, focusing on flows in product and their design that can expose the bank to losses due to fraud analyzing the impact continuity in the Bank's operations.

The bank has formed various policies for mitigating the operation risk like Employee Bylaws, AML/CFT policy. Risk Weighted Exposure for Operation Risk has been calculated as per NRB Capital Adequacy Framework

#### Market Risk

Market risk refers to the risk arising from movements in market prices, in particular, changes in interest rates, foreign exchange rates, and equity and commodity prices. The Finance Department of the bank continuously monitors Equity price risk and interest rate risk and communicates the same to senior management and RMC as deemed necessary. However, the bank does not deal with forex.

#### Liquidity Risk

Liquidity risk is the *risk* that a company or bank may be unable to meet short term financial demands. This usually occurs due to the inability to convert a security or hard asset to cash without a loss of capital and/or income in the process. Liquidity risk arises because of the possibility that the Bank might be unable to meet its payment obligations when they fall due, as a result of mismatches in the timing of the cash flows under both normal and stress circumstances. Such scenarios could occur when funding needed for liquid asset positions is not available to the Bank on acceptable terms. To mitigate the liquidity risk, the bank daily monitors the liquidity position. Periodic review of gap over the assets and liabilities management is performed.

#### **Reputational Risk**

The management committee is responsible for protecting the bank's reputation and ensures bank does not take any activity that may cause material damage to reputation of the bank. Further, the bank has appointed the information officer
